PERSONAL PROJECTS

Courstack(under construction) ⬈
- Platform acting as a gateway to developer courses of all major websites like coursera, udemy ,udacity etc so that one can compare the courses and select the best one for himself without bothering to look at each sites individually.
- Also providing the user with learning path for web-development and android.
- Project Link : https://github.com/ravi-kr-singh/Courstack

Portfolio Website ⬈
- My first Website built using only HTML and CSS .
- CSS flexbox was used.
- Project Link : https://github.com/ravi-kr-singh/ravi-kr-singh.github.io
